

SkyDSLr

Professional-quality aerial photography

STC FAA-Approved

STC FAA-Approved pod, cabling, mounting system and FAA-Certified installation guide.

In-cabin operation

Allows for automatic and remote-controlled cabin operation. There's no need for open windows or other compromising solutions.

Laptop computer-controlled

Camera operation and adjustments are controlled by your carry-on laptop computer and the camera manufacturer's software. You now have greater control and flexibility during and after flight time.

SkyIMD is a provider of innovative solutions for aerial imaging and intelligence. We are committed to providing advanced solutions that are affordable and easy to deploy and operate.
